</tbody>
</table>

**Self-monitoring**
- Monitor health condition and take body temperature twice daily
- Take appropriate personal disease prevention measures, wear a mask and maintain hand hygiene
- Daily RATs, confirmed negative results before leaving residence
- Login to the Medical Surveillance System to record RAT results and health status

The handling arrangements for persons tested positive will be aligned with that for local cases
- Vaccine Pass will be switched to Red Code
- Please provide information to the Centre for Health Protection through the online platforms (for nucleic acid tests or RATs)
- If the household environment is not suitable for isolation or the original hotel is not available for on-site isolation, inbound persons tested positive would be sent to Community Isolation Facility or Community Isolation Hotel

* except inbound persons aged below three years old

^ Inbound persons aged three years old or above on the date of arrival at Hong Kong have to undergo PCR-based nucleic acid testing by professional swab sampling at Community Testing Centres / community testing stations or ad-hoc mobile specimen collection stations (free), or at recognised local medical testing institutions (self-paid), as specified in the relevant testing requirement above

# Inbound persons must keep the photos of their RAT results and SMS of their PCR nucleic acid test results in case of compliance checking.

For detailed boarding, medical surveillance and self-monitoring requirements as well as other details, you should also refer to the latest press releases, relevant information on the webpage and FAQs

Version date: 21 November 2022

**Accessibility:**
- Text is readable and organized in a clear format.
- Key points are highlighted for easier understanding.
- The table and diagram provide a visual representation of the Quarantine Arrangements.

**Note:**
- The information is accurate as of 21 November 2022.
- Readers are encouraged to consult the latest press releases and the Centre for Health Protection’s website for the most up-to-date information.

---

*RAPT*: Rapid Antigen Test  
*PCR*: Polymerase Chain Reaction
